PASSERO SERIES

Large width of seat , enjoy sitting

The curves of the seat bag and backrest are soft, comfortable and considerate to the needs of the body, achieving a beautiful visual effect of rigidity on the outside and soft on the inside.

The pursuit of perfect details, not only stays in the imagination of the designer, but also integrates the thoughts and concepts of the customers' overall needs. With the human beauty as the design concept, coupled with the aesthetic appeal of nature, we design such a beautiful, durable, and functional product.

NATURAL LIFE

PASSERO SERIES

Steady feet and relax for a while

Removable pedals make body relaxation easier. The pedal soft pack area is filled with shaped cotton to provide soft support for the legs; the bottom foot is made of die-cast aluminum alloy for stable weight bearing.

Design to improve daily life

The concept of comfort is constantly evolving, expanding to new possibilities and adapting to the profound changes in our daily lives.

FRT THE HUMAN BODY CURVE DESIGN

The thoughtful design reveals a touch of comfort and simplicity. In the design process, we discard all cumbersome details and bring you a natural and smooth visual experience.
